Week ending May 23, 2025

Equities, bonds, and the US dollar fell last week due to US budget concerns and increased uncertainty surrounding US tariff policies. US debt was downgraded by Moody's due to concerns about lack of progress from prior Congresses and presidential administrations to curb rising government deficits. Standard & Poor's (2011) and Fitch (2023) previously downgraded US debt. Now all three major rating agencies align on an AA-rating. A tax bill passed from the House to Senate seeking to extend the 2017 tax cuts with additional provisions. Congressional Budget Office estimates the net impact of tax cuts, new spending, revenue, and additional interest-rate costs to increase the federal budget deficit by \$3 trillion over the next decade. Long-term interest rates have been trending upwards since September 2024, when the rate cutting cycle began. The combination of increasing debt levels and higher interest rates are driving federal interest costs to historic highs. Trump threatened the EU with 50% tariffs and Apple with a 25% rate, which served to increase uncertainty around US trade policies and contributed to the down week for equities. As negotiations progress, trade uncertainty should decrease but as last week showed potential for bumps along the way remains.

Fixed Income Markets Overview

- Long-term yields rose between 8 and 15 basis points last week leading to a steepening of the yield curve. 10-year yields ended the week at 4.51% while the 20- and 30-year yields each closed above 5%. Higher long-term yields aren't unique to the US as Japan, Germany, the UK, and Australia are dealing with similar pressures.
- Expectations for rate cuts from the Fed continued to ease. Bloomberg expectations for a 25-basis point cut at the June FOMC meeting fell to 2% from 5%, and expected number of rate cuts in 2025 fell to 1.96 from 2.05.
- Mortgage rates ticked up slightly to 6.86% but remain below 7% for the 18th consecutive week. Stable rates and a slight bump in inventories may be attracting potential buyers as mortgage application activity is up 18% from a year prior.

Equity Markets Overview

- All three major US equity indices retreated between 2.4% to 2.6% due to US trade policy developments and US budgetary concerns. Markets gave up some of the recent growth as the S&P 500 is again posting a loss of 0.8% YTD.
- All sectors posted losses for the week ranging from decreases of 0.4% to 4.4%. Energy, Technology, and Real Estate took the biggest hits with losses of 4.4%, 3.5%, and 3.3%, respectively. Consumer Staples, Telecommunications, and Materials sectors held up best with losses of 0.4%, 0.6%, and 1.2%, respectively.
- Large caps held up slightly better than their smaller peers with all size segments posting losses ranging from 2.6% to 4.1%. From a style lens, growth held up moderately better than value in all size segments. Of all US style and size segments, only US large cap growth stocks are positive on a YTD basis with a 0.1% gain.
- International stocks continue to outperform US equities on a YTD basis as developed market equities posted a small gain of 0.9% last week, while emerging markets retreated slightly with a loss of 0.1%.
